

## About the institute

ICAR-IGFRI, is mandated to conduct basic, strategic, applied and adaptive research; development and training in forage production and its utilization. The Institute has highly experienced and internationally trained human resources engaged in needed, participatory, inter-disciplinary approaches. With more than 57 years of experience in forage research and development, IGFRI today stands as the premier R&D institution in South Asia. It has provided technologies, human resource development skills, consultancy and technical services on forage production and utilization to government and non-government organizations, agri-business and farmers.

## About the workshop

Online workshop is being organized as part of National Initiative for Accelerating Fodder Technology Adoption (NIAFTA) to disseminate advances in production and conservation technologies of kharif fodder. It has been designed for the officers of state line department, KVK staff, SAU, students, NGO staff who are engaged in fodder production.
